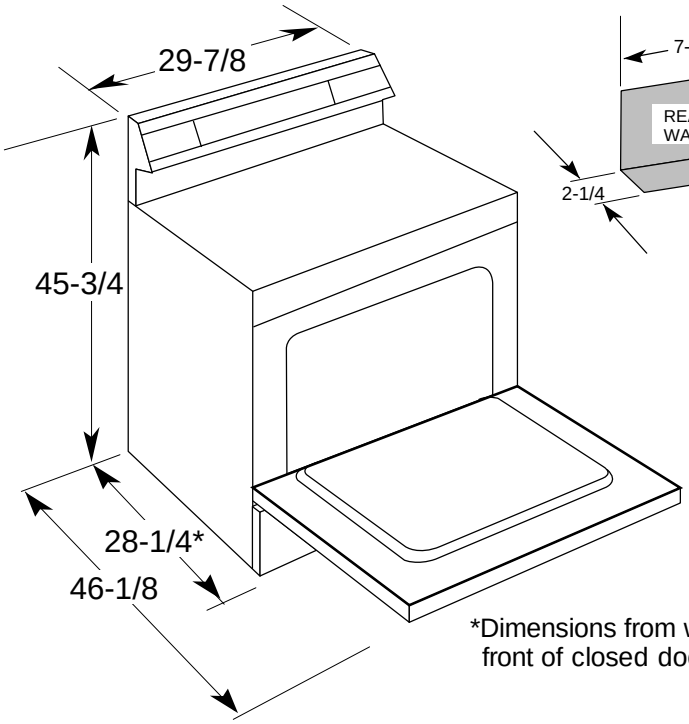
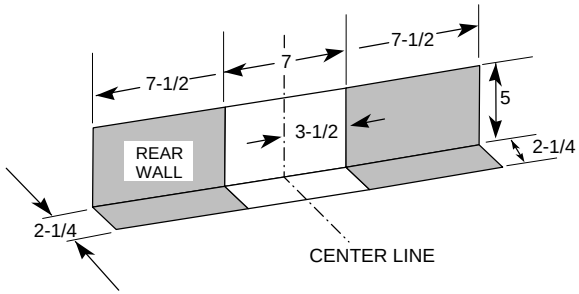
LEB356WY—30" Free-Standing Electric Range

Dimensions and Installation Information (in inches)



*Dimensions from wall to front of closed door handle.



KW Rating	
240V	10.1
208V	7.6

Receptacle Locations: Flexible service cord or conduit must be used because terminals are not accessible after range installation. See shaded area in drawing for location of electrical outlet box. Recommended outlet locations allow range to be installed directly against rear wall.

Note: Conforms to U.L. requirements for 0" spacing from walls above countertops. To reduce possibility of scorching of walls, engineering recommended a minimum of 1-1/2" spacing to allow for possible extended, high-heat, no-load heating element operation.

Installation Information: Before installing, consult installation instructions packed with product for current dimensional data.
